HISTORY

In RADARCAN®, we are a family business with a path of more than 30 years researching, manufacturing and commercializing devices for pest control.

We started in 1981 manufacturing electronic products for large international firms and, since 1989; we developed a line of products with our own technology, focused on providing the highest innovation and sophistication. Since then, in RADARCAN®, we have created and developed different models and versions of electronic devices to combat annoying animals in the cleanest and most hygienic way, offering an alternative to the use of chemicals and pesticides, harmful to health. At the same time, we provide solutions in the field of ionizing and air purification, protecting our customers from mites and harmful particles from polluted air. We also offer products developed in collaboration with veterinarians and coaches designed to facilitate the process of training dogs and cats and help control their behavior.

Since our inception, we have been committed to the development of products and technologies with the priority of respecting the environment and the pursuit of the highest quality in each of our devices.

Today, RADARCAN® products are sold and marketed in more than 30 countries worldwide, including the US and Japan.

MISSION

RADARCAN® is working since 1989 with the aim to offer people and their pets the environmental comfort and well-being they deserve. Through the development of products and own technologies, our mission is to provide effective, sustainable and hygienic protection against insects, parasites, unwanted animals and harmful environments. All devices are developed in collaboration with research institutions, laboratories and universities that enhance the development and effectiveness of each product.

With a familiar organization and a team of professionals, RADARCAN® work every day with passion looking for the highest quality in our product range, manufactured in our own European facilities to get the trust of all customers worldwide.

VISION

RADARCAN® leads the international insect and pest repellent market through the use of innovative, non-systemic technologies. It is also recognized as a leading brand in its field, due to the effectiveness and quality of its products, which may be purchased in both mass distribution and specialized retail channels.

R & D & i

In RADARCAN® we have a design and R & D & i department of specialists in entomology, dedicated to ensure the exhaustive control of the results of all products. The R & D & i team works with the constant challenge to innovate and improve the devices, both inside and out, combining the effectiveness of technology with practicality and minimalism in design.

With a company policy focused on customer satisfaction, our administrative and technical staff is constantly ready and available to respond accurately and quickly any questions or concerns that may arise by consumers.

We also have effectiveness certificates of independent laboratories and we collaborate with universities in research and development that confirm and certify the effectiveness of our products.

RADARCAN® IS A MARKET LEADER, THANKS TO ITS HIGH LEVEL OF SPECIALIZATION

MANUFACTURING

All our products are manufactured in our own European facilities to ensure the highest quality in the development of the entire production process from the start of production until the final result of the product. So are we ourselves who take care of controlling both the production and the quality of the devices, monitoring each step and seeing firsthand that there is no mistake in the process.

DOUBLE QUALITY CONTROL

In RADARCAN® we perform a double exhaustive quality control of our devices. On the one hand, by adjusting each of the products individually and, secondly, performing a visual function test once the product is assembled.

OUR EVOLUTION

We have focused our efforts on improving our products on the inside, and reflecting this on the outside. This is the result of passion, innovation and technology, together with practicality and minimalism.

EFFECTIVE PRODUCTS

Our in-house design and R&D departments, with entomologists, give us complete control over the results of our products.

RADARCAN® is probably the only manufacturer to have its own efficacy tests for its products, which are conducted at prestigious and accredited independent laboratories or universities.

COMMITMENT AND SATISFACTION

At RADARCAN®, we are firmly committed to our responsibility to our customers, which is why our offer is based on products with guarantees of maximum quality and effectiveness.

Our after-sales service is designed to provide the highest degree of satisfaction possible; to ensure this, specialized staff are available to answer your questions 24 hours a day, 365 days a year.

COMPANY AND PRODUCT PHILOSOFHY

- OUR PRODUCTS DO NOT NEED CHEMICAL, TOXIC AND POISON REFILLS, THEREFORE WE THINK OF YOUR CONFORT AND WE HAVE THE MAXIMUM RESPECT AND CARE FOR THE ENVIRONMENT.
- ALL OUR PRODUCTS ARE ELECTRONICS AND 100% SECURE. THEY HAVE BUILT-IN SECURITY TECHNOLOGIES SUCH AS SALVUM AND FUGO.
- OUR PRODUCTS DO NOT KILL INSECTS AND ANIMALS, OUR PRODUCTS DRIVE THEM AWAY WITHOUT ENDING THEIR LIVES AND THEREFORE, IN THE MOST PRACTICAL AND HYGIENIC WAY (NO TOUCH-NO SEE-NO KILL TECHNOLOGIES). AS EVERY INSECT AND ANIMAL HAS ITS ROLE ON OUR PLANET, WE ALSO DO NOT BREAK THE LIFE CYCLE AND KEEP SAFE THE ENVIRONMENT.
- SUITABLE FOR BABIES FROM 0+ YEARS OLD SO OUR PRODUCTS CAN BE USED TO PROTECT THE YOUNGEST OF THE FAMILY.
- HIGH EFFECTIVENESS PROVEN IN UNIVERSITIES AND LABORATORIES.
- WE OFFER UP TO 5-YEARS WARRANTY.
- DESIGNED AND MANUFACTURED IN SPAIN.

¿WHY YOU SHOULD CHOOSE RADARCAN®?

- WE ARE SPECIALISTS WITH MORE THAN **30 YEARS** OF EXPERIENCE.
- OVER **6 MILLONES** OF HOUSEHOLDS ALREADY RELY ON RADARCAN®.
- OUR PRODUCTS ARE SOLD IN MORE THAN **30 COUNTRIES**.

IT IS ESSENTIAL TO KEEP OUR HOMES, BUSINESSES AND INDUSTRIES **PROTECTED FROM ANY UNWANTED INSECTS OR ANIMALS** IN ORDER TO BE COMFORTABLE AND TO FEEL GOOD.

CONVENTIONAL SYSTEMIC AND INVASIVE SYSTEMS ARE INCREASINGLY AGGRESSIVE FOR ANIMALS, BUT ALSO FOR HUMANS, GIVEN THEIR IMMUNIZATION CAPACITY. OUR MISSION IS TO PROVIDE **EFFECTIVE, SUSTAINABLE AND HYGIENIC PROTECTION**.

RADARCAN® PRODUCTS ARE DESIGNED TO DISTURB NON-DESIRED ANIMALS MAKING THEM GO AWAY FROM THE COVERAGE AREA. ALL DEVICES ARE DESIGNED TO GET RID OF UNWANTED ANIMALS AND TO PREVENT THEIR RETURN WITHOUT CAUSING ANY HARM TO PEOPLE OR PETS.

ALL DEVICES ARE DEVELOPED IN COLLABORATION WITH RESEARCH **INSTITUTIONS, LABORATORIES AND UNIVERSITIES** THAT ENHANCE THE DEVELOPMENT AND EFFECTIVENESS OF EACH PRODUCT. MOREOVER, THEY ARE MANUFACTURED IN OUR OWN FACILITIES IN SPAIN, TO ACHIEVE THE TRUST OF ALL THE CLIENTS WORLDWIDE.

RADARCAN® TECHNOLOGIES

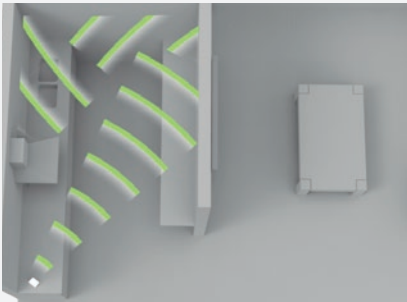

INSONUERIT [1.0 // 3.0]

These sounds are produced at frequencies so high that they are imperceptible to the human ear. On the other hand, some animals do perceive this sound and are bothered by it, which forces them to leave the protected area.

Each model is calibrated with a set frequency and power, specific in each case to the animal being repelled.

The devices emit ultrasonic waves in all directions. Solid materials provide for the best propagation of the waves, which bounce off of them.

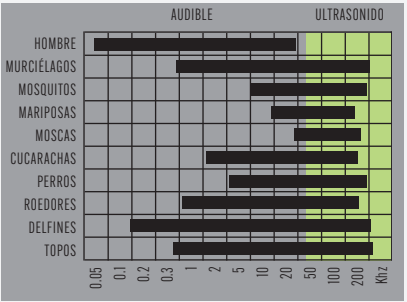

SONUERIT

Low frequencies. These frequencies are audible to humans, and in some cases can be used to repel pests.

Audible frequencies for humans and approximate frequencies for use with different types of animals.

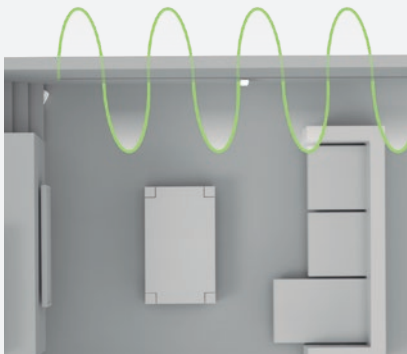

MAGNETICAE

Alters the magnetic fields generated by the electrical wiring in buildings (homes, industrial facilities, etc.), which creates a barrier for ants.

This technology does not interfere with electrical or electronic devices.

ION.EVO [1.0 // 2.0]

Air treatment similar to that found in nature, providing great comfort and well-being during the entire time you spend in your home or car.

Pollution and electronic devices create an imbalance in the environment, charging atoms with a more positive charge (cations). This is harmful to our health, and it can cause asthma, depression, insomnia, migraines, fatigue and general malaise. They are also focal points for infection by pathogens and bacteria.

ION.EVO 1.0 ionizes the environment, generating large amounts of beneficial charges (anions) to counteract this imbalance.

In the case of **ION.EVO 2.0**, a small amount of ozone is generated to maximize the disinfection of the environment, getting rid of bad odors (not just covering them up), and eliminating bacteria, smoke, dust and pollen.

CERTIFIED FREQUENCY

External laboratories vouch for the efficacy of RADARCAN® products.

CALIB

INSONUERIT technology includes an optimization stage for the fine-tuning of the frequency, which is calibrated using precision instruments for a higher degree of efficacy.

InOutCooler

Some high-performance products need a cooling system. With this in mind, we have developed a ventilation system that maintains the ideal temperature for the product.

SMT

The manufacturing of devices with SMD microelectronic technology means smaller sizes and high performance.

DEMITTO

Maximum optimization of electronics to obtain even longer battery life.

FUGO

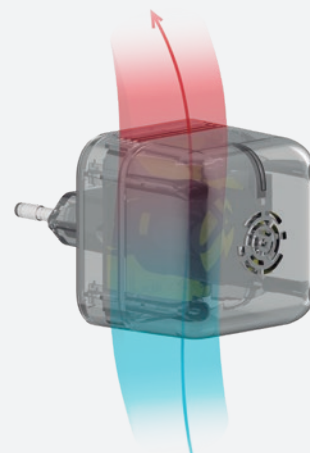

The materials we use are fire resistant. Any flame would burn out immediately, before a fire could break out. Also certified for the U.S. directives.

SALVUM

Surge protection system to prevent malfunctions. Ensures continuous optimal performance with an unlimited duration.

PICTOGRAMS

 5-Years warranty registering the product in RADARCAN web site.

MOSQUITOS

PERSONAL MOSQUITO REPELLER PLUS

The PERSONAL **MOSQUITO** REPELLER **PLUS** protects you from mosquitos during your outdoor activities. Both practical and hygienic, it uses no chemical products.

The PERSONAL **MOSQUITO** REPELLER **PLUS** can be used as a portable device left on the table during dinner or worn as a clip or a bracelet, thanks to the special band we have created that fits the device perfectly. Made from hypoallergenic silicone treated to make it soft and pleasant to the touch.

Helps prevent bites of the following species: **Common** Mosquito, **Tiger** Mosquito, Mosquitoes transmitters of **Malaria**, **Dengue**, **Chikungunya** and **Zika**.

MOSQUITO REPELLERS FOR HOME

At RADARCAN®, we have worked to develop a simple product that is attractive, minimalist and effective. Feel more protected than ever with the **MOSQUITO** REPELLERS FOR HOME.

With the PORTABLE **MOSQUITO** REPELLER you will be able to carry it anywhere without power source, even at camping tents or vehicles.

Helps prevent bites of the following species: **Common** Mosquito, **Tiger** Mosquito, Mosquitoes transmitters of **Malaria**, **Dengue**, **Chikungunya** and **Zika**.

 **INSONUERIT 1.0**

TECHNICAL SPECIFICATIONS

Reference	R-102	R-107
Coverage area (max.)	25 m²	25 m²
Power source / Batteries	100 - 240 V AC	4 x 1,5 V AAA (not included)
Consumption / Batteries duration	0.08 - 0.35 W	3 months (24h/day)
Size	50 x 50 x 28 mm	50 x 50 x 50 mm

ANTS

ANTS REPELLER

With the **ANT** REPELLER, you'll forget you have ants in the house.

Operates with **MAGNETICAE** technology that uses the wiring of your entire house to provide up to 125m2 of coverage, altering the magnetic field ants use to find their way around. the change disorients the ants, causing them to leave the area protected by the device.

This product is equipped with **InOutCooler** technology to maintain a suitable temperature inside the product.

TECHNICAL SPECIFICATIONS

Reference	R-104
Coverage Area (max.)	125 m ²
Power source	100 / 240 V AC
Consumption	3 / 6 W
Size	50 x 50 x 50 mm

FREE OF CHEMICALS - NO REFILLS

R-104 // ANTIHORMIGAS

RATS, MICE, ROACHES AND BATS

MOUSE AND ROACH REPELLER

Protects your home by emitting ultrasound waves that are unbearable to mice and cockroaches, driving them away from the area protected by the repeller.

The PORTABLE **MOUSE / ROACH** REPELLER has been designed for indoor use. By not using chemical or toxic products, it is perfect to place in sensitive areas such as pantries or kitchens. Moreover, as it does not need plugs, you can place it in inaccessible areas such as false ceilings, under furniture or in kitchen cabinets.

In addition, It drives these animals away without ending their lives and therefore, in the most practical and hygienic way.

TECHNICAL SPECIFICATIONS

PORTABLE **MOUSE** / **ROACH** REPELLER

RODENTS / ROACHES / BATS PRO

This model is the most powerful. With the plus of power of this model, you will get to keep out rodents, roaches and even bats, forgetting about them forever.

The **RODENT / ROACH / BAT** PRO REPELLER has been designed for indoor and outdoor (under cover) use. Since it does not use chemical or toxic products, it is perfect to place in sensitive areas such as pantries or kitchens. Moreover, it has a 500m2 indoor coverage, being perfect for protecting large rooms such as warehouses, industries, offices, garages or professional kitchens.

In addition, It drives these animals away without ending their lives and therefore, in the most practical and hygienic way (NO TOUCH-NO SEE-NO KILL).

TECHNICAL SPECIFICATIONS

PEST REPELLER

The **PEST** REPELLER is the most complete model we have ever manufactured.

It is no longer necessary to have more than one of our products to be free of annoying animals and insects, such as ants, flies, mosquitoes, mice and cockroaches. This model offers all the technologies necessary to fight them all.

TECHNICAL SPECIFICATIONS

Reference	R-200
Max. Coverage area (Mosquitos, Mice & Roaches)	25 m ²
Max. Coverage area (Ants)	125 m ²
Power source	120 / 240 V AC
Consumption	3.2 / 7 W

MITES AND AIR PURIFIERS

AIR PURIFIER FOR CAR

The **AIR** PURIFIER for car is equipped with **ION.EVO 2.0** technology that emits a small amount of ozone and a large number of beneficial ions, which allows it to keep the air in your car constantly clean and odorfree.

Its small size becomes the world's most compact air purifier for car and it is equipped with LED light.

Its average lifespan is 1,500 hours, which is equivalent to 2 years working an average of 2 hours a day.

TECHNICAL SPECIFICATIONS	
Reference	R-501
Use	Car, Van, Truck Caravan, Camper
Coverage area (max.)	Inside the car
Power source	12 V DC (Car socket)
Ions emission	2,000,000 ions/cm³
Ozone emission	≤ 0.05 ppm
Size	ø22 x 56 mm
FREE OF CHEMICALS · NO REFILLS	

R-501 // AIR PURIFIER FOR CAR

ION.EVO 2.0 TECH TO PURIFIER THE AIR

CAR **AIR** PURIFIER uses **ION.EVO 2.0** technology, designed to counteract the harmful environment found inside the car, with stale air from the smoke of snuff, the smell of pets, the automotive plastics and a lot of odors that are a source of problems such as asthma, fatigue, headaches and burden. Its functioning is based on the issuance of a large amount of anions (negatively charged ions) and a small amount of ozone, balancing the harmful environment and eliminating odors, smoke and bacteria. it works imitating the effect of nature generating a similar atmosphere that the one we feel when we are near a waterfall or after a storm: fresh, clean, healthy and well-being.

It is certified to reduce colonies of bacteria such as *Escherichia coli*, *Staphylococcus aureus*, *Pseudomonas aeruginosa*, avoid sources of infection and favor comfortable and pleasant environments..

ION.EVO 2.0 TECH ALSO TO FIGHT AGAINST THE DUST MITES

The allergy known as “DUST ALLERGY” is caused by the fresh deposition of mites and is the main cause of allergic asthma (inflammation of the bronchi) and allergic rhinitis (inflammation of the nasal mucosa).

Humid environments, in which the existence of positively charged ions (cations) predominates, favor the appearance and development of mites generating “dust allergy”. **ION.EVO 2.0** releases anions (negatively charged ions), counteract the excess of positive charge and contribute to reduce the relative humidity of the environment. In this way, an unfavorable environment for the development of mites is generated and on the other hand it contributes to the dehydration of the feces, also decreasing the propensity to your allergy.

Ideal for allergic people who will reduce immediately the allergic symptoms and it contributes to improve air quality, increasing the oxygenation of our lungs and decongesting the respiratory system.

MITE REPELLER AND AIR PURIFIER FOR HOME

The **MITES** REPELLER AND **AIR PURIFIER** FOR HOME is specially designed to improve air quality. It acts on dust mites by altering their biological cycle; this causes them to release less fecal matter (the trigger for many allergies) and allows you to enjoy better quality air. Ideal for allergy sufferers.

It is primarily designed for rooms susceptible to the presence of - or even infestations by - dust mites: bathrooms, kitchens, studies, offices, hotels, restaurants, etc.

TECHNICAL SPECIFICATIONS

Reference	R-502
Coverage area (max.)	25 m²
Poser source	110 / 230 V AC
Consumption	0.40 / 2 W
Ions emission	20.000.000 ions/cm³
Ozone emission	≤ 0.00 ppm
Removes particles	0.1 microns
Size	190 x 131 x 95 mm

FREE OF CHEMICALS - NO REFILLS

INSONUERIT 6.0

ION.EVO 1.0

R-502 // MITE REPELLER AND AIR PURIFIER FOR HOME

INSONUERIT 6.0 TO FIGHT MITES

The allergy known as “DUST ALLERGY” is caused by the fresh deposition of mites and is the main cause of allergic asthma (inflammation of the bronchi) and allergic rhinitis (inflammation of the nasal mucosa). INSONUERIT 6.0 provides a technical solution to “DUST ALLERGY” in two ways:

- The interaction that exerts on the mites directly alters their biological cycle, what makes them diminish the ingestion of foods and therefore the emission of fecal particles.
- Modifies the reproductive behavior of mites, reducing the laying of eggs.

ION.EVO 1.0 TO REINFORCE THE FIGHT AGAINST MITES

Humid environments, in which the existence of positively charged ions (cations) predominates, favor the appearance and development of mites generating “DUST ALLERGY”.

ION.EVO 1.0 releases negatively charged ions (anions), counteract the excess of positive charge and contribute to reduce the relative humidity of the environment. In this way, an unfavorable environment for the development of mites is generated and on the other hand it contributes to the dehydration of the feces, also decreasing the propensity to your allergy.

ION.EVO 1.0 TECH TO PURIFIER THE AIR

Which is responsible for improving the air quality inside the home. The atmosphere inside the buildings, where we spend much of our time, is full of positive (harmful) ions (called cations) produced by pollution, smoke and all kinds of waste, being a source of problems such as asthma, fatigue, headaches and burden environment.

Its functioning is based on the issuance of a large amount of anions (negatively charged ions) to balance the positive (harmful) ions of the environment and thus it gives us confort and contributes to improve air quality, increasing the oxygenation of our lungs and decongesting the respiratory system.

It is certified to reduce colonies of bacteria such as *Escherichia coli*, *Staphylococcus aureus* and *Pseudomonas aeruginosa*. It avoids sources of infection and creates a cozy, comfortable, fresh, clean and pleasant environments.

The effectiveness of the **MITE REPELLER AND AIR PURIFIER** is tested at universities and independent laboratories against Dust Mite (*Dermatophagoides farinae*).

**WELL-BEING
FOR ALL THE FAMILY**
